[E-mail subject line]: **Invitation to June 7th Lake Champlain Watershed Discovery Meeting for Clinton County**

Dear Stakeholder,

The Federal Emergency Management Agency (FEMA) in partnership with the New York State Department of Environmental Conservation (NYSDEC) has started a new [Risk Mapping, Assessment, and Planning](#) (Risk MAP) “Discovery” project for the Lake Champlain Watershed which includes all or a portion of your community. FEMA's Risk MAP program is designed to provide quality flood maps, other tools including data, and support to assist communities in taking action to reduce flood risk.

The Discovery process of FEMA’s Risk MAP program is about the “discovery” of flood hazards and flood risk in a particular watershed. As part of the Lake Champlain Watershed Discovery project, which also includes neighboring areas in the Mettawee River watershed, FEMA and NYSDEC will work closely with local communities and organizations to collect information about flood mapping needs, including flooding issues and flood mitigation activities; recent development; and other issues related to flood risk.

Your involvement in this project is very important because the information collected will be used to develop recommendations for a future Risk MAP project that may be initiated if funding is available. Such a follow up project could include the creation of digital flood maps, risk assessment or mitigation planning assistance.

NYSDEC and FEMA recently conducted Pre-Discovery webinars to present an overview of the project. The next step will be in-person Discovery Meetings for communities, agencies, interested organizations and watershed groups. During the meetings, we will review flood risk data collected, discuss your community’s floodplains, mitigation plans, and flood risk concerns, and the vision of the watershed’s future. Attendees will be able to meet one-on-one with project team members to discuss local flooding issues, provide feedback on their community’s existing floodplain maps, and learn more about programs and activities that may help reduce flood risk.

The Discovery Meeting for stakeholders in **Clinton County** is scheduled for **Tuesday, June 7, 2016 from 1:30 PM to 4:00 PM** and will be held at the following location:

Clinton County Office of Emergency Services
16 Emergency Services Drive
Room 123 (Large Auditorium)
Plattsburgh, NY 12903

Kindly confirm your organization’s attendance to Grace Vinson by e-mail at gracevinson@clarkgroupllc.com or by phone at (802) 917-0582 by **June 3, 2016**.

We encourage you to read and distribute the enclosed project flyer and to extend this Discovery Meeting invitation to other interested individuals in your organization (e.g. code enforcement officer, engineer, planning board, public works department, highway department, etc.) and other

local or regional groups such as watershed associations, chambers of commerce, and realtor, lender, and farmer organizations.

If you have not already done so, please complete the Discovery Stakeholder Survey online at <https://www.surveymonkey.com/r/DiscoveryLC>, or request a PDF or paper copy of the survey by contacting Grace Vinson using the contact information above. The survey includes questions about current and historical flooding problems, accuracy of flood maps, and other important information that the project team is requesting from communities and organizations such as yours. Completing the survey **before** the Discovery Meeting will allow us to use the time during the meeting most efficiently.

We strongly encourage you to participate in the Discovery Meeting. *This is your opportunity to ensure that FEMA and NYSDEC are aware of local flooding issues and flood mapping needs.* If you have any questions, please contact NYSDEC at 518-402-8185.

We look forward to your participation,
